DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, and 32-41 drawn to a projection exposure apparatus, classified in class 355, subclass 53.
 - II. Claims 9-12, drawn to a projection exposure apparatus, classified in class 355, subclass 55.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions have separate utility such as determining an displacement amount of the projected image formed through the projection exposure apparatus based on a driven amount of the projection optical system and measuring a baseline amount corresponding to a distance between a detection center of a substrate position detector and a center of the projected image. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2851

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
